

Connect. Streamline. Customize.

Retail Backbone is a comprehensive, web-based software solution designed to streamline retail operations. We are driven by the fundamental idea that technology should enable you to manage your business faster, better, and smarter. Comprised of easy-to-use customizable modules providing full lifecycle support across all sales and fulfillment channels; Retail Backbone eliminates tedious and costly manual processes, allowing organizations to save time, energy, and money.

Popular Modules

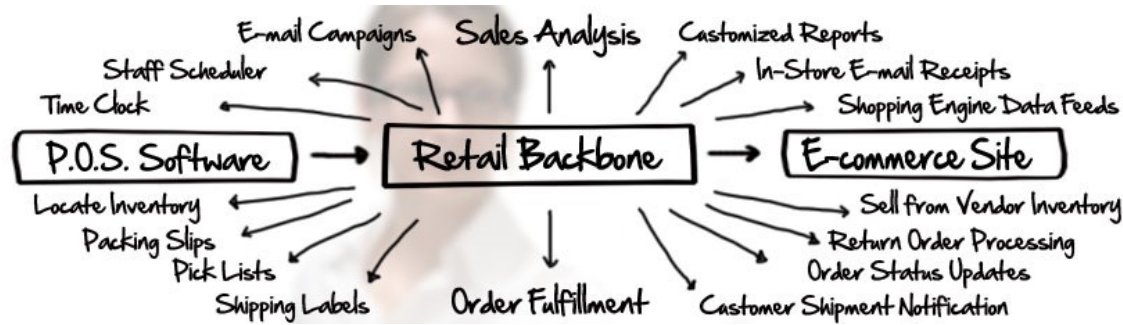

- ◆ Inventory Management
- ◆ Order Fulfillment
- ◆ Vendor Inventory / Dropship Integration
- ◆ Ecommerce Catalog Management
- ◆ Amazon / eBay Integration
- ◆ Online Point of Sale

We Know Retail

Our team of experienced database/application developers specializes in mission-critical retail operations.

Visit us at www.retailbackbone.com for more information or to schedule a demo. We look forward to helping you streamline your operations and expand your business!

Sophisticated, Not Complicated

- Fully web-based application means simple deployment and full functionality from any web-connected device
- Highly skilled and experienced developers and web designers
- No convoluted ticketing system; if you need support, simply send an email to support@retailbackbone.com and one of our skilled consultants will be in touch with you shortly
- Ensures Point of Sale software communicates seamlessly with E-Commerce software (we understand how important it is to leverage both sales channels in today's marketplace!)
- Fully customizable platform: In addition to the robust framework of core features already in place, Retail Backbone can be rapidly customized to meet the specific business needs of each organization.
